Product description:

Balance between aesthetics, stability and packability

The Leaf Shelf is an attempt to create a shelving system that strikes the ultimate balance between aesthetic, stability and packability. It is characterised by a very pure aesthetic that aims to make the column legs the centre of attention. With an organic and clean expression, sculpted in the shape of a leaf, they give the system its signature look. The construction itself is also ground-breaking in terms of stability, as it is entirely contained, without any visible screws or other stabilising parts under the shelf.

Due to the versatile design, the shelf looks great from all angles, meaning it can be used as a sideboard, free-standing shelving or a room divider.

Designer's thoughts:

"I like the convenience of flat pack shelves, but often I find them lacking either in aesthetics or stability. The Leaf shelf is my attempt to create a shelving system striking an ultimate balance between aesthetics, stability and packability. My intention is for this shelving system to come in many different heights and widths, suitable for a wide range of homes and businesses." – Jonas Lutz
