

# Bubble Club Philippe Starck

Bubble Club is made of batch-dyed polyethylene and is the pioneer in a new concept of furnishing accessories: the industrial sofa made entirely of plastic. Technology and research have allowed Kartell to be the first design company to mass-produce what has traditionally been handmade. Bubble Club is a large two-seater sofa, characterised by the soft line of the armrests, in contrast with the more essential and rational line of the backrest. Along with the armchair and the new small table, produced with the same finishing and colours, today Bubble Club is complete family, nothing less than an "industrial living-room". Thanks to their exceptional weather resistance, all the members of Bubble Club family can survive perfectly outside.
