

# SERRALUNGA

Design: Rodolfo Dordoni - 2000

## MING

The Ming flowerpots designed by Rodolfo Dordoni are appreciated for their generous dimensions, underlining the upper large border and for its traditional yet modern design which can be adapted in any given situation, either public or private. While sketching, the designer had in mind cactaceous plants such as, cactus, agave, rich and prickly, to blend in contrast with a soft and sensuous shape of the flowerpot.
